Vice-President—Mr. S. R. Bakke.

Secy-Treas.—Mr. Jas. Lowrie.

Lawn Committee—Messrs. Wm. Webster, Jas. Gordon and Angus McFee.

The first game was played to-morrow by the president and vice president on the lawn on George street.

## Cowardly Assault.

At Gilmore on Saturday last an old man was lying in a drunken sleep on the platform of the Great Central station, when he was brutally assaulted by a young man named John Dufos, kicking and pounding him in a shameful manner. The affair, though a very serious one, was scarcely noticed by the bystanders, and the rights are often seen in the hotel and street.

We wish the license inspectors and license commissioners would do their duty and not grant any liquor license in or near this place. The old man was the young man's uncle.

If I were of France, I would be a better Frenchman than I am.

Or what better Frenchman than I am.

For my Cook, and take it home.

## An Extensive Business.

Which Close and Careful Attention has been given to the details of the business.

Meats, Wallbridge & Clarke have been plotting the destiny of the India ware house since 1871. At that time the business was confined to the gun shop on Bridge Street, but as their attention to business and courtesy to patrons widened their field, additional premises to the east of that and commodious store rooms above were leased to hold reserved stock, until they had one of the largest, best known and most flourishing business in this section of country. They now occupy 6,000 square feet on Bridge Street. The old grocery store is devoted to bottled liquors, under the care of Mr. Nightingale, while a handsomely furnished room west of the old stand contains the grocery stock. This room has the woodwork, counter and shelving finished in cherry by McCullough, and the ceiling and wall tastefully painted by Twining. Attached to these premises are extensive cold storage rooms.

On Front street they have the premises formerly occupied by Wm. Templeton, 7,000 square feet in extent, and carry on an immense business there. The career of the firm has been uniformly successful from the time of opening to the present. The quality of their goods is undoubted and they have the full confidence of a large patronage, won by integrity and promptness in the discharge of their duties.

A REPLY GOING TRAVELLING COMPANION—Terry David Paley Kitchin.

Wm. Paley was sick, we gave him Castoria.

When she was a child, she cried for Castoria.

When she became a woman, she gave her children Castoria.

When she had children, she gave them Castoria.

## A PLEASANT ANNIVERSARY.

Mr. Wm. Johnson, Inspector of Weights and Measures, established a church class for young men about eleven years ago and it has been his custom, ever since, to celebrate each anniversary by inviting the members to a banquet.

The members of the class, who have steadily increased in numbers that the old plan is now impracticable and the pastor of the church was used last night. Many members were present, making a total of some two hundred or more persons.

After the first table of refreshments had been disposed of, Mr. Johnson was, to his surprise, called to the front and some warm looking men and secretary containing Chances Encyclopedia, a Yale, and Smith's Bible Dictionary, in vials, was brought in and placed beside him.

Mr. Johnson, on behalf of the class, presented an address, stating that as the class was about to be divided on account of the large number of members and that others were leaving the city, they took the opportunity of giving a public expression to their appreciation of his kindness through the years that he had been their leader.

Not only on Sunday, but at all times, he was alive to their spiritual welfare and ready to obey by word and deed.

The surprise was complete. In replying Mr. Johnson said the prayer of his mother had always been, Oh God, make my boys useful men, not rich, but wise. Since his conversion he had endeavored to fulfill that prayer; it had been his one ambition. It would be foolish to profess not to know that he had been in a measure successful. When his business took him to other parts of the county he met young men who had met in his church class and it was a joy unspeakable to have them refer to the help they had received when a stranger at Bridge Street. He was once a stranger in Belleville himself and found a friend in the Hon. M. Bowell, and he knew what it was to have the hand of friendship extended to him. His classmate was married to a family. While he helped them they helped him.

Rev. Mr. Laroed said that in all his 30 years of church work he had never met a more earnest worker among young men.

The members of the class were invited to social pleasures, closing with a short anniversary praise service.

Mr. Johnson read a carefully prepared report showing that the class started with a membership of 49 in 1877. Since that 420 names had been enrolled, 35 names were added as the result of the recent revival. A division has been made in the class by giving 23 to the charge of Mr. T. S. Clarke, leaving 19 in charge of Mr. Johnson.

Will be found invaluable for the hair scalp. It cleanses the scalp of all dirt, invigorates the growth of the hair, cures all baldness where there are no signs of roots left it will produce new crops of hair. It restores gray hair to original color, and is an excellent dressing. Do not delay if your hair is in this condition but get a bottle at once.

## Daily Intelligencer.

BELLEFEUR, MONDAY, MAY 7.

### MEET MENTION.

Mr. A. H. O'Brien, drunk was discharged. Mr. Reddick, drunk, fined \$2 or 10 days.

The recent rain and fairly mild weather have given the grass a boom.

A regular meeting of the Board of Education will be held to-morrow evening.

At the Bellefleur Hotel, a party of five, including a doctor and his wife, arrived.

Mr. W. B. Northrup has purchased and is living in the Coleman property, North Front Street.

THE USUAL TREATMENT of catarrh is very unsatisfactory, as thousands of despairing patients can testify. On this point a trustworthy medical writer says: "Proper treatment is positively necessary to success, but many, if not most of the remedies in general use by physicians afford but temporary benefit. A cure certainly cannot be effected from astringents, powders, douches and washes." Ely's Cream Balm is a remedy which combines the important requisites of quick action, specific curative power, perfect safety and pleasantness to the patient.

## THE MINISTERS' KINGS.

T. P. & W.'s Combination at the Opera House Last Night.

Two Hours and a Half of Solid Fun.

The well-known minstrel Thatchers, Primoes & West, with their large company of artists, were greeted by a full house last night. Long before the curtain rose every available seat, up stairs and down, was occupied, while the "gods" turned out in force. There was a splendid sprinkling of the fair sex present, eager to see and hear the famous kings of the burnt cork profession. The overture, "The Huntsman," in which the three deans met the orchestra, was very fine. A sketch by Robt. McIntyre, assisted by the Clippert quartette, was well received and highly applauded. The comic songs by Ben. Collins and Lee Hawkins, with their clever local hits, carried the house by storm. Fred. Oakland, who possesses a magnificent tenor voice, gave "That Melody Divine" in first-class style, while on occasion Thatchers brought down the house with his topical song, G. H. Primoes, as the duet, caused the mirth to flow and long. The "Fakir of Hindostan," a bright and witty sketch, was very cleverly rendered by Hawkins, Collins and Powers. Ward and Marks gave a very neat exhibition of tumbling and acrobatic feats. The specialties of G. Thatchers were immense, and the Freeman's parade was as well executed as if performed by our own brigade. Hawkins and Collins kept the audience in a roar of laughter while they introduced some new and taking specialties. The entertainment concluded with a roving burlesque.

The costumes worn during the first part were elegant and the finest ever seen on the stage here.

"A BARREL FULL OF MONKEY" is a good thing to have, but what's it good for? It is good for you! Preserve your health by using Imperial Cream Tartar Baking Powder.

**Chosen.**  
NEW YORK, May 8.—Receipts for the week, 15,155 boxes; exports, 17,143,000. The receipts of new cotton have largely increased, and clearing of old stock have been liberal, with sales of choice selections, either white or colored, at about 11c.

**DOMINION PARLIAMENT.**  
—MORRIS, May 7.  
A return was brought down to day relating to the dismissal of Archibald Culbertson from the office of Indian Commissioner on the Tjensdalen reserve. Culbertson, it appears from the papers, has been a bad man. The return also states that he had been dismissed for his bad conduct.

The bills introduced by Mr. Jamieson and Mr. McCarthy to amend the Scott Act were passed.

Mr. Spruce moved a resolution to provide, by bill or otherwise, for the branding of cheese the product of the United States, when exported through or from Canada, in such a manner as to indicate the country of manufacture, and the sale of it in Canada should be stopped. He went on to show the extent of the trade in Canada. Canadian cheese had earned for itself a good reputation in the foreign markets, and this reputation should be protected.

Mr. Taylor in moving the motion, said he thought the Government should deal with this question of cheese in the same manner as oleomargarine. He hoped the article of land would be treated in the same manner. The Government should deal with the matter properly.

Hon. Mr. Bower, on behalf of his constituency, thanked the hon. gentleman for having brought the subject before the House. Every possible step should be taken to protect the manufacture of cheese, and butler against the spurious article. The request made by the hon. member for East Grey to stop all products from American territory after they reach Canada and stamp them was also being considered. They could not interfere with the agreement between the United States and Canada regarding the arrangement for the transport of the American product through Canada. It was well known that the Canadian Government had no control over any article further than to prevent its entrance into consumption in the country. So far as that request in the resolution was concerned it could not well be adopted. The hon. member suggested that the Canadian Government had no control over any article further than to prevent its entrance into consumption in the country. So far as that request in the resolution was concerned it could not well be adopted.

**The British Post Office.**  
The report of the Postmaster General of Great Britain is an exceedingly interesting document. It shows in a very striking way what a huge people the British are and how highly they are civilized. It takes an hour to do the work of the Post Office of Great Britain. The number of officers on the permanent staff of the department is 34,000. There are, besides this, 47,000 persons who are employed as postmen and carriers. The number of women employed on the permanent staff is 17,007, and there are 18,000 postmen and carriers of letters. The number of letters, telegrams, postcards, packages, and newspapers that pass through the hands of this army of post officials is simply unimaginable. There have passed through the British Post Office during the year ending March 31st, 1,424,000,000 letters, or an average of 40 to every man, woman and child in the United Kingdom. Besides this mountain of letters the officials handled 151,000,000 newspapers, 181,000,000 post cards, 200,000,000 parcels and circulars and 32,800,000 parcels, making a grand total of 2,192,000,000 separate articles or 60 to each person of the population. The mail endeavors in the United Kingdom are very great.

But this does not include all the work of the British Post Office. It dispatched and delivered 40,137,470 telegrams. And besides all this it has to do with the business of the British Post Office Savings Bank is of itself an immense institution most beneficent in its nature. Twenty-five years ago, at the end of the first year of its establishment, the total amount exclusive of interest standing to the credit of depositors was £216,921, considerably less than eight millions and a half dollars. On the 31st of December last the deposits amounted to £30,874,330, or over \$50,000,000. In addition to this the balance of Government stock held by 35,305 depositors was at the close of the year £2,886,945, so that the total sum due to the depositors of the Post Office Savings Bank was £33,761,275, and the total sum of deposits was £33,761,275. The deposits last year were 6,662,393 in number, and amounted to over seventy eight millions of dollars.

The postal order business done by the British Post Office is very great. The amount of money transmitted was £12,969,711. The Postmaster General says that "the 5s, the 10s, and the 20s orders command the most popular and are found to be about half the total."

The Post Office in Great Britain, notwithstanding the very considerable loss on the telegraph service, is paying institution. Its revenue last year was £10,715,778 and its expenses were £8,291,243, the net revenue was therefore £2,424,535 and the advantages gained from it by the British public, and in fact, the public in all parts of the civilized world, are simply incalculable.

The Post Office has a very curious, and shows in a very lively manner the eccentricities and the stupidity of many of the members of the returned letter offices 14,219,970 mistakes of one kind and another. Of these, 447,228, by some blunder of the sender, were unreturnable. What makes the stupidity indicated by this number of unreturnable letters more singular is that 178,653 of these were registered or contained enclosures of value. But the queerest thing of all that there were during the year 27,128 letters posted wholly unaddressed, and 628 of these contained money or cheques amounting in all to more than twenty three thousand dollars. It appears that the percentage of blunders of this kind is from year to year pretty much the same, and does seem strange that out of a given number of people a certain proportion will neglect to sign their letters and another proportion will forget to address them.

That is to say, your lungs. Also all your breathing machinery. Very wonderful machinery it is. Not only the larger air passages, but the thousands of little tubes and capillaries leading from them.

There is just one danger in all this machinery, and that is, it may get choked with matter which ought not to be there, your lungs, and your breathing machinery, and what they do, cannot do well.

Call it cold, cough, croup, pneumonia, bronchitis, or any other name, but the family of throat and nose and lung obstructions, all are bad. All ought to be got rid of. There is just one remedy for all these troubles. That is to take Boecher's German Syrup, which any druggist will sell you at once, and if you do not feel better, it has failed you, you may depend upon this for certain.

**Dangerous Counterfeits.**  
Counterfeits are always dangerous. The one that they always closely imitate the original by appearance and name. The remarkable success achieved by Naal Balm as a positive cure for Catarrh and Cold in the Head has induced unprincipled parties to create a bogus Naal Balm, and to sell it at a low price, and to induce people to be deceived by nostrums imitating Naal Balm in name and appearance, bearing such names as Naal Cream, Naal Balm, etc. Ask for Naal Balm and do not take any imitation for Naal Balm. ## Canadian Industries

AN ENGLISH OPINION OF COMMERCIAL UNION.

(London Daily Telegraph—Free Press.)

John Stuart Mill held that the colonies were justified in imposing duties on foreign goods so as to encourage the growth of local industries, which industry would be crushed in their infancy by English competition. Canadians, however, have much more reason to dread their American rivals. They are, as to speak, the spot, connected by lines of rail with every Canadian city and town. They have on their side maturity and immense capital. Were Canada once opened free to the United States, it would be deluged with Yankee goods that no Canadian factory could stand the competition for twelve months. This would simply mean that the Dominion would come to be a manufacturing state. It would sink back into a mere farm for the United States—an agricultural annex to the great republic. Its population would consist almost exclusively of the idle, the weak, the poor, the paupers of wood and drawers of water to Americans, flourishing in all the varieties of commerce, manufacturing and trade. This is not what true Canadians desire. They have since 1879 they have fostered factories of all kinds on their soil, and the result has been so successful that hundreds of Americans have transferred their machinery and their capital across the border, so as to secure the new market by residence in Canada itself. They have thus afforded employment to thousands of Canadians, who are fast becoming patriots of a handsome type. The great advantage of a mixed population—Everybody knows that agriculture thrives best in the neighborhood of factories and towns, and the natural ideal is one that would drive the farmer to the factory, and the factory to the farm. Everybody knows that agriculture thrives best in the neighborhood of factories and towns, and the natural ideal is one that would drive the farmer to the factory, and the factory to the farm.

## Latest Cheese Markets

(Uttah Herald, May 8.)

Arrivals of new cheese in New York last week were much larger than the week before, but the demand for it was light, and prices had to come down. Home trade was dull and seemed to want but few of this class of goods. Holders of old cheese were slow to get rid of it, and the market was there, and as long as the English can get old cheese for about the price of new, they will not hesitate to take the old. The carrying over of so much old stock has certainly injured the market for new. The high prices paid for cheese last summer and fall prevented it being sold during the winter, as dealers naturally wanted to get their money back if they could, and therefore held on as long as possible before allowing prices to drop. England wouldn't pay the price asked, and the result is that we came into the new market with a large stock and have had to sell at a loss for many years.

Following is our usual table of quotations:

	Receipts	Supply	Price
May 8, 1888	24,000	10,000	85¢
May 7, 1888	18,000	8,000	82¢
May 6, 1888	15,000	6,000	80¢

At last the ice is broken, and a price has been paid for cheese. It isn't very high, but perhaps all that could have been expected under the circumstances for a few cheese buyers have orders for a few cheese and on the account were able to make a market. But so far as we could learn, no cheese was bought outright except such as the purchaser had a place for.

Beginning to be considerable complaint in the country at the continued lateness of the season. The snow is gone, and the roads are in a fair condition, but the weather remains cold and very dry, and pastures are late than as now, but hay was plentiful and cows were in good condition. It is the universal decision now that cattle have not been turned out in such poor spring in many years, as they will be this spring. And for the turning out, quite a number of dairies will be turned this week on to nearly bare soil, simply because there is so little for them to eat in the stable. It will take a warm, soaking rain to start the pastures into life and until that comes, the cows will simply have to grub at the roots of the grass. Following are the transactions of the day: 650 boxes at 91¢, 917 boxes at 91¢, 4,271 boxes on commission; total 5,838. All the cheese sold at 91¢, 91¢, was colored stock, and all that at 91¢, was white. Transactions one year ago were 4,317 boxes, rating 111¢; two years ago they were 2,530 boxes, all consigned.

Little Falls, N. Y., May 7.—The sales were 226 boxes at 91¢, 32 at 90¢, 50 at 89¢, 2,334 on commission; total 2,934; 303 boxes of farm dairy sold at prices ranging from 82¢ to 111¢. Forty-eight packages of butter sold at 22¢ to 34¢; the bulk at 23¢.

Saved at Sea.

Philadelphia, Pa., May 8.—Capt Quick of the steamer *Arctus*, which was in collision with the steamer *Benon* on Sunday, who, with his crew of 38 men, were supposed to have been drowned, arrived here this morning on the Canadian boat *Arctus*, and were brought by the steamer *Benon*, having been transferred to that vessel from the big *Caroline* ship, which picked up the shipwrecked crew Sunday.

Use East India Tonic Bitters as a spring  
medicine and tonic and liver invigorator.

There was no quorum of the members at  
the meeting of the Board of Education last  
night.

Mr. Geo. A. Thompson has purchased  
the Moody & Easton ice business and will  
have a wagon on the route in a few days.

Mr. Gilbert Jones' new steam launch  
"Vera" was launched to-day and was ex-  
pected to make her first trip this afternoon.

ATTEN: Graham has purchased James  
McGraw's lively stable and moved the  
stock to the rear of the Headquarters  
Saloon.

There evidence was taken this morning in  
the case against Capt. Mullin for obstruct-  
ing the harbor. The magistrate will give  
judgment to-morrow.

Mr. Craig, the gas inspector, has been  
making his presence felt in West Belleville  
during the past two days. He had im-  
pounded no less than 17 vagrant cows.

Mr. GILLES says, after trying many  
remedies for a severe cough, he procured a  
bottle of Holden's Expecterant at Geo's  
drug store and it gave him immediate relief.

At a meeting of the Taborian Quar-  
terly Board, Mr. W. B. Gordon was chosen  
representative to the district meeting and  
Mr. W. H. Dunn was recommended to  
conference for the travelling conference. A  
choice of paper was not decided upon.

THE USUAL TREATMENT of catarrh is very  
unsatisfactory, as thousands of despairing  
patients can testify. On this point a trust-  
worthy medical writer says: "Proper local  
treatment is positively necessary to suc-  
ceed, but many, if not most of the remedies  
in general use by physicians afford but tem-  
porary benefit. A cure certainly cannot be  
expected from poultices, douches and  
washes." Ely's Cream Balm is a remedy  
which combines the important requisites of  
quick action, specific curative power with  
perfect safety and pleasantness to the pa-  
tient.

THE DRIVE.  
The drive of logs in the Moira is progress-  
ing very satisfactorily. It is expected that  
the present run, the "hang up" portion of  
last year's drive, will be through the gap in  
about two weeks, and that the head of this  
season's drive will be through the gap in  
water is low and falling gradually, but the  
men are doing lively work, and making fair  
progress.

HOSPITAL.  
The Belleville Hospital will be open to  
visitors in future every Monday, Wednes-  
day and Friday from 2 o'clock until five  
p. m., by order of the Hospital Board.  
Signed, Jane C. Jones, Chairman of Hospital  
Board.

Note.—It has been found necessary to  
close the Hospital to visitors on Sunday, as  
their presence in the building presents any  
possibility of divine service being con-  
ducted with due reverence.

announced as follows: Mr. John Charlton,  
M.P., chairman; Professor Robert Bell,  
O.M.A.; Mr. W. H. Merritt, of Toronto;  
Mr. W. C. of Madoc; and Mr. A. Bliss,  
of the Bureau of Industries, secretary.

## Personal.

Rev. J. E. Connor, a native of this city,  
and gold medalist at Victoria University  
will leave in the morning for Duluth, Minn.,  
his future field of labor.

Mr. Robt. Duffy, cheese maker at  
Kirkville farm last year, has been engaged  
to manufacture for this season in the  
provinces.

Mr. Wm. Johnson, Regent of the Belleville  
Royal Arcanum, is the representative to  
the Grand Council now in session at St.  
Catharines.

Mr. T. S. Clark, assistant manager of  
the Bank of Montreal, is expected home

cert.

This superb Concert, arranged, assisted  
by Miss Anna Carpenter, appears, will give  
one of their grand concerts at the Opera  
House here next Friday evening, May 11th.

Mr. Walter Donnelly has received word  
that people will attend this concert from  
Trenton, Ontario, Deseronto, and Napanee.

The Louisville Club—Mr. J. J. Ryan, of  
this famous Quilts Club—has been

Mendelssohn's "Dance" Hollandaise, and  
as was expected, created something in  
the nature of a furor. Blumberg's

## BELLEVILLE MECHANICS' INSTITUTE.

## The Annual Meeting—Treasury's Report—Election of Officers.

Two Thika Resolutions—A lively and in-  
teresting session.

The regular annual meeting of the Me-  
chanics' Institute was held in the reading  
room last evening. The news having got  
about that there were to be two tickets for  
the Treasurer, Mr. P. J. M. Anderson,  
M.P., chairman; Professor Robert Bell,  
O.M.A.; Mr. W. H. Merritt, of Toronto;  
Mr. W. C. of Madoc; and Mr. A. Bliss,  
of the Bureau of Industries, secretary.

The Treasurer, Mr. P. J. M. Anderson,  
began to read the minutes of the  
meeting held a year ago, when Mr. W. N.  
Fenton, with customary benevolence, sug-  
gested that the treasurer be spared the  
trouble, and that the minutes be accepted  
as read. The suggestion was acted upon.

Mr. Anderson then presented the fol-  
lowing:—

TREASURER'S REPORT.  
Notwithstanding the apathy manifested  
by some who ought to be friends of the In-  
stitute, the fees for membership are in ex-  
cess of any previous year, and the balance,  
after paying the bills, is \$34.02.

The falling off in the receipts from bil-  
liards is, to a large extent, due to the fact  
that the revenues have been applied rigidly  
to the purchase of books and papers, and  
to the maintenance of the tables, a course  
which seemed necessary, owing to the city  
grant not having been received this year.

## Had a Good Time.

## An Unworthy Object of Charity in Court.

For some time past the police have had  
their eye upon a house on Pope street, near  
the Exhibition park, inhabited by Mr.  
Miranda Sweet and Mary Clarke. The  
house is a small one, and the support of Mr.  
Sweet, who a few weeks ago had his  
husband in the Police Court charged with non-  
support. Chief Newton and officer Cook  
visited the house shortly after 6 o'clock last  
evening and found four young men there  
holding a high old carnival. The Chief was  
in the room and had hold of one of the  
quintessence of the police. Two made a run  
for the door and were recognized by officer  
Cook, while the fourth, whose face had not  
been seen, attempted to jump through a  
window. The officer or got him by the foot  
and as two thirds of his body was through  
the broken window, he reached through  
and got him by the coat collar. The but-  
ton were not on tight enough and the re-  
sult was that officer Cook stood in the room  
with a buttoned overcoat and underneath in  
his hand while the owner was fleeing over  
the common in his shirt sleeves. Had the  
police been half an hour earlier they would  
have found twelve instead of four men at  
the house. Two of the four appeared be-  
fore Judge, Magistrate this morning and paid  
their fine, \$10 each. Mary Clarke, of whom  
the officers say a more abundant woman  
they never saw, was fined \$20 or 3 months.  
She went up.

Mr. Sweet has three small children. Sen-  
tence was suspended to give her a chance  
for reform. Her husband was willing to take  
her back and support her and the family if  
she would lead a right sort of life. War-  
rants were issued for the two who escaped  
last night.

C. P. R.  
ANNUAL MEETING OF THE SHAREHOLDERS  
CANADA'S TRANSCONTINENTAL ROAD

The annual meeting of the shareholders of the Canadian Pacific Railway was held at the offices of the company in Montreal on Wednesday. The report shows the earnings for the year to have been \$11,412, and working expenses \$8,102,294, net earnings \$3,504,118, less the charges \$3,260,263, leaving a surplus of \$243,855.

The report makes reference to the city and untaxed snow fall of last winter which had so great an effect on the commerce by the interrupting the first four months of the year, that the net earnings fell to \$400,000 during the period as compared with that preceding. The deficiency in crops in Ontario and the unusually early falling of the leaves at the facilities of the city seriously affected its earnings. The same deficiency also affected the seeger and all other traffic in the province. The earnings of the company being consequently on the traffic with the North and British Columbia, and as such the earnings per mile were reduced, being below those of 1886. The large amount of last year's crop yet to be moved from North West will ensure satisfactory results for the first six months of the present year. The steamship service between Vancouver and Seattle, and the coastwise trade in the last report, has fully justified all expectations as to the value and importance of the trade to be developed.

direction. The negotiations then in progress with the Imperial Government for the establishment of a permanent line of first class steamers, suitable for use as cruisers in time of war, has so far progressed that a subsidy of \$60,000 has been obtained for a monthly service. The details of a formal contract have been

cally settled, but owing to negotiations pending between the Imperial and Dominion Governments as to an improved telegraphic service, not yet signed. The complete telegraph system is growing in importance and will during the year reach the cities of the Maritime Provinces. A line has been extended south to San Francisco. The grain elevators at Fort William and Arthur have earned a satisfactory return, but the increase in grain production in the Northwest necessitates an increase in storage. Two new elevators are to be constructed.

Port William and one at Owen Sound. Of all the dyspeptic remedies ever in the market, Dowling's Pepsin Compound takes the lead. Why? Because it acts not on the digestive organs of the stomach, as mechanically, like the other patent medicines, it helps to assimilate and digest foods that enter the stomach. the city shows. (See windows.) Our  
workmanship and fit equal the best in Can-  
ada.—Jas. Hannaway, the merchant tailor  
and gent's furnisher.

## Foot Ball.

A foot ball match is arranged to take  
place between the Trenton High School  
and the Institute team, tomorrow after-  
noon, on the grounds of the latter. Game  
commences at 2:30.

## Personal.

Mr. Jas. L. Burton, lumberman, of Bar-  
rie, is at the Queen's.

Mr. Wm. Johnson has been elected to the  
committee on law of the Grand Council of  
the Royal Arcanum.

## By Proxy at Colborne.

On Tuesday night, the 8th inst., the shop  
of Mr. Bright, watchmaker, Colborne, was  
literally consumed on account of carelessness  
of watchmaker, including two gold cases, being  
carried off. An entrance was easily effected  
by forcing in the door.

## Sudden Death.

In March last Mr. Euphath Minaker,  
son of Mr. Lewis Minaker, of South Mary-  
bury, visited the old homestead after an ab-  
sence of 17 years. He remained for a few  
weeks and returned to Colborne, where he  
was taken ill, and died on May 4th, aged  
about 40 years.

## Circular Saw Accident.

A son of the owner of the street car com-  
pany had the index finger of his left hand  
nearly severed off yesterday afternoon. He  
was engaged sawing blocks at Walker's  
foundry when he tripped on a block and in  
putting out his hand to save himself his  
finger came in contact with the saw. Dr. Ross  
dressed the injured member.

## Alleged Gold and Silver Finds.

It is reported that gold bearing rock has  
been found on the farm of Henry Gurney,  
Township of Wolfston, about half a mile  
west of Col. Hill.

Silver is said to have been found in  
Chandos by Cameron Bros. The ledge  
which is claimed to have been discovered is  
near the foot of Eagle Lake.

## Token of Appreciation.

The Rev. Mr. Ostrom, pastor of the  
Main St. Methodist Church, Picton, was  
presented with an elegant and costly silver  
water pitcher, by the Oddfellows of the  
Bay of Quinte Lodge, No. 145, as a token  
of appreciation of his annual sermon  
preached in Picton on the 29th ult. The  
pitcher bears a suitable inscription.

## The Catle Luncheon.

The cow by law was put into full effect  
last week, and the little boys. The  
bonus of 20c and the punishment fee of 20c  
have cleared the streets, says the *Express*,  
clearing of course some grumbling, but on  
the whole great relief to a habit too preva-  
lent in villages, that of turning the  
streets into barn yards, to say nothing of  
damage to sidewalks and gardens.

## The Coming Eclipse.

The next eclipse of the moon on the  
night of July 22nd, will be even more in-  
teresting than the one of Jan. 28th. The  
diameter of the earth's shadow will be much  
larger at the time in proportion to the di-  
ameter of the moon, darkening its surface  
during totality. It can be said to plan  
about midnight, when the moon will be  
high in the heavens and will be visible in  
this neighborhood.

## The Quintette Club.

This evening's concert promises to be a  
great success, both musically and financially.  
Miss Maud Burdett, Ontario's favorite con-  
certist, will sing a fine selection, accompa-  
nied by the Quintette Club. Miss Anna  
Carpenier, the prima donna of the  
club, has attained a great reputation both  
in this country and in Europe. She is,  
undoubtedly, one of the greatest singers  
of the day. The two other sopranos, Miss  
Lillian Clark, and Miss Lillian Clark, are  
also of the club. No one can afford to  
miss their performance. Every place they  
have been in, has been full of praise for  
their performance. A good seat will be  
very much appreciated.

## Tenders for Horses.

Three tenders were submitted to the Fire  
committee last evening for horses and  
drivers for the fire department.  
Robt. McCoy's tender was for 3 horses  
and drivers at \$1.40 per day for each man  
and driver at \$1.50 for less than three.  
C. C. Chrysler, \$1.38 for two or three  
horses and drivers.  
David Orr, \$1.38 for each or \$50.70 per  
annum for each horse and driver.

## The Committee recommended to the Council that the tender of Robt. McCoy be accepted.

The law for reorganizing the fire de-  
partment was also recommended to the  
Council that the tender of Robt. McCoy be  
accepted.

## It fitting boys and those whose names Halloway's Cure are in the list. Get a bottle and use and cure your cough.

## Temperance Campaign.

## An Organization of Young Men Formed Last Night.

A meeting of young men interested in  
organizing a temperance association was  
held in St. Andrew's church last evening.  
Mr. A. G. Northrup presided; the attend-  
ance was fair.

The clause of the constitution that was to  
be the main point of the association, the  
foundation upon which to build, was the  
subject of a protracted debate. The  
majority were in favor of a straight pro-  
hibition platform, pledged to political  
unity in the cause, but the meeting  
adopted the following preamble to which  
to anchor:

"It is the object of the association to  
the total prohibition of the traffic in intoxicat-  
ing liquors, in accordance with the prin-  
ciple of the temperance cause, and to  
harm and by personal intercourse seek  
to attain the national prohibition."  
The following officers were elected:

President—W. E. Holton.  
Vice President—S. W. Lester.  
Secretary—D. Simola.  
Treasurer—Chas. McCullough.  
Committee—C. G. Vandusen, Dr. Nash,  
Alison Walker, G. A. Kingston, G. Z.  
Sloan.

The next meeting will be held on Wed-  
nesday, 31st inst., at a place to be chosen by  
the committee.

## The Standpipe.

CONTRACTOR MORRISON COMPLETES HIS JOB.

Contractor Morrison has completed his  
job on the water works standpipe, which  
was filled with water to show the  
result was very satisfactory, only a few  
tiny jets were visible, and these were near  
the base of the pipe. The top quarter sec-  
tion of the pipe is dry, showing that there  
is no leakage above. When only 40 feet of  
the pipe was filled there was no leakage,  
but the immense pressure about the base  
when the tank is filled, forced water through  
cracks which did not show before. These  
are receiving Mr. Morrison's attention.

The top of the tank furnished a grand  
view of the surrounding country. A nimble  
climber at the bottom is likely to be a fine  
rock climber at the top of the 120 feet  
iron ladder, but the labor of the ascent is  
easily repaid by the beautiful view that is  
revealed from the top of the pipe. Cani-  
on seems to nestle cooily among pines to  
the north. The Oak Hills seem very  
near and the bay stretches away to the  
east and west like a wide river. Picton can  
be seen nestling among the hills to the  
south east. Shamoonville is also visible  
and the smoke from Gilmore's mill shows  
the location of Trenton, but the hill on the  
left shuts out the view of the town. In the  
far east the hills of the Niagara are  
court house gleams brightly and is  
quite distinct from its green  
surroundings. The city lies like a  
map before the observer, the outlook  
seeming to be almost a bird's-eye view of  
the point of observation. As our look  
over the place from the elevation a feeling  
experienced is that everything must be peace-  
ful, happy and prosperous below; the houses  
have yard room and appear to be  
contented with their lot. The city lying east  
of church street and south of the  
Hotel has the appearance of being built in  
a wood, the shade trees are so numerous.

## Another Success.

Miss Burdett sang at the pavilion to-  
night at evening at a complimentary con-  
cert to Mr. Agnes Thomson.

The *Express* says: "Miss Maud Burdett  
appeared in the second number, and  
"Ah, Sestina," Mercadeo. This young  
lady possesses a rich and pleasing contralto  
voice, and last night made a favorable im-  
pression. She came before the footlights  
last night, and gave a song by Wallace. "The  
winds that wait my sighs to thee." She  
was warmly applauded on both occasions.

## Shamoonville Notes.

Another old resident has passed away at  
a ripe old age. Mrs. Leverton, mother of  
Wm. and John Leverton, of Tyndessing,  
and Mrs. Hicks, of Coryville, died after  
a few hours illness on Monday last, aged 78  
years, over forty of which were spent in  
this country. She was buried on Wednesday  
in Shamoonville cemetery by Rev. Mr.  
Geen. The very large funeral showed in  
what high esteem she was held.

## THE HEATHEN CHINESE

and all Christian people are last looking out

owner of the famous Royal Velvet Cakes.

## The Pacific Railway.

The report of the Canadian Pacific Rail-  
way about the time of the 7th of the company  
is a flourishing condition. The pro-  
gram made by the company has been in-  
deed phenomenal. Had anyone seven  
years ago predicted that the revenues of the  
road in 1887 would be more than eleven  
millions and a half, and that its net earn-  
ings would amount to over three millions  
and a half, he would be regarded as an  
enthusiastic visionary. The growth of the  
line has been the most rapid and the ap-  
pearance of being healthy. Its business is  
steadily increasing. The road has an excellent  
character, and neither labor nor expense is  
wasted in the least. The good reputation it  
has earned, its extensions seem all to  
have been judiciously made and the steam-  
ship lines that have been established in  
connection with it are necessary to its  
proper development. The company is  
richly rewarded for the road must come  
in that energy and enterprise have seldom  
been more intelligently or more beneficially  
exercised than they have been in the con-  
struction, the operation and the extension  
of the Canadian Pacific Railroad.—Mont-  
real Star.

## They Won't Press It.

## An interesting point has been raised in the Central Bank double liability litigation.

A number of shareholders, while appealing  
against their liability, attacked the charter  
of the bank, claiming that it was not  
legitimately obtained, and the directors  
were not qualified to act. In consequence  
of these allegations they held that they  
should be relieved from the double liability.  
In answer to these arguments the court  
in Chancery ruled that should they be suc-  
cessful in proving that the Central was not  
a properly chartered bank it would then  
be established that it was a partnership.  
The shareholders would become partners,  
and instead of being doubly liable for their  
subscription their liability would be un-  
limited.

Charles H. Backman, who was convicted  
of setting fire to the vessel, while the crew  
were asleep, was sentenced to San Juan  
for thirty-five years.

General Boulanger in his book strongly  
condemns colonial adventures. He is not  
retained to us. He is not retained to us.  
"As long as Alsace-Lorraine is not returned  
to us we have no right to divide our forces,  
especially when the advantages aimed at  
are not quite clear."

It is now said that the profits of the  
Booth-Barrett company have been over  
\$200,000, of which Mr. Booth will  
receive for his share \$50,000, and Mr.  
Barrett for his \$50,000. This is the  
greatest sum ever made in one season by  
any theatrical enterprise.

## "AN OLD SAYING."

"Try, try, try," is a very old saying but  
it is a good one. A very good one. I have  
been trying and trying to get something to  
cure my cough, and I have tried many  
things, but I have not been successful. I  
have tried many things, but I have not  
been successful. I have tried many things,

POISON FOUND IN CANDY.

Simple Tests That Can Be Applied by

Any One Who Suspects Its Cause.

The board of health has not interfered

with the manufacture of candy in New

York city, though the fact that candy is

very frequently adulterated is well known,

and there can be no doubt that occasional

intoxication would be wholesome. It would

be doing injury to many confectioners to say

that the practice is almost universal, and yet

one is tempted to say it, for the proportion

of adulterated confectionery that is sold is

very large compared with the pure. The

subject has not escaped notice, and Dr. Ed-

son recently gave some points of interest

to every candy eater, and has described

some simple tests that may be easily and

advantageously applied before eating unex-

pected candy. He describes the adulteration

as being of three kinds, those for bulk,

those for color and those for flavor.

In order to increase their profits,

the confectioner will use terra alba, kailin,

ground quartz, whitening and starch. These

Dr. Edson declares injurious, though they

are harmless. He advises that a little of the

ground quartz be dissolved in cold water.

If kailin or quartz has been used it will

settle to the bottom of the glass. If whitening

is present, it will make the solution milky.

Dr. Edson also says that a little of the

ground quartz will make the solution milky.

By burning a little of the candy and mix-

ing the ash with water and a little chloride

of barium a white cloudiness may be produced.

If it is there, there is probably terra alba in the

candy. Adulterations for color, he says, are

some of them harmless, and some highly in-

jurious. He recommends that a little of the

candy be dissolved in alcohol. If it is

discolored, it is probably adulterated. If the

color is yellow, it is probably adulterated.

If the color is red, it is probably adulterated.

If the color is blue, it is probably adulterated.

If the color is green, it is probably adulterated.

If the color is black, it is probably adulterated.

If the color is white, it is probably adulterated.

If the color is brown, it is probably adulterated.

If the color is pink, it is probably adulterated.

If the color is purple, it is probably adulterated.

If the color is orange, it is probably adulterated.

If the color is grey, it is probably adulterated.

If the color is olive, it is probably adulterated.

If the color is tan, it is probably adulterated.

If the color is cream, it is probably adulterated.

If the color is light blue, it is probably adulterated.

If the color is light green, it is probably adulterated.

If the color is light red, it is probably adulterated.

If the color is light yellow, it is probably adulterated.

If the color is light brown, it is probably adulterated.

"I SAY WHAT I THINK."

"I say what I think," says the valiant man,

With a voice and a look of daring.

Determined to act on a solid plan,

And for nobody's comfort caring.

"I say what I think," and at every chance

This impulse of his shewing.

He plans to do as much as a single glance

He doesn't think what he is saying.

Oh, many an arrow will reach the heart

For which it was never intended,

And a hurt can never be mended;

And many a friendship may be lost,

And many a love-link broken.

Because of neglect to count the cost

Of words that are lightly spoken.

"I say what I think," Ah! the truly great,

Who give their wisdom expression

In chosen phrases, ponder hesitate

Before they speak, and then they say

For what that injury might be wrought,

What evils would not be another,

And in order to increase their profits,

Without regard to each other.

To say what you think is a noble thing

When your voice for the right is needed.

To speak out your mind with a ringing

When order and law are impeded;

And the evil thoughts that flow through the

And the heart should be retarded.

We lessen the tide of grief and pain

When our speech is carefully guarded.

You may think what you choose, nor give

Be a traitor, and not display it;

As I say it I do it in common sense,

By silence you will not betray it.

And I'll be written in black ink

For the up of each man and daughter,

For the as who always say what they think

Are most of the time in hot water.

CATARRH.

A New Home Treatment for the Cure of

Catarrh, Catarrh of the Bladder

The microscope has proved that these dis-

eases are contagious, and that they are due

to the presence of living parasites in the

urinary tract. These parasites are of the

nature of the bacteria, and are found in

the urine, and in the secretions of the

urinary tract. The regular treatment of

these diseases has been to apply an irri-

gation, and as a natural consequence, the

keeping the delicate membrane in a condi-

tion of irritation, allowing it no chance to

heal, and as a natural consequence, the

disease cannot be cured by any application

made often than once in two weeks, for

the membrane must get a chance to heal

before an application is repeated. It is

now seven years since Mr. Dixon dis-

covered the parasite in catarrh, and formu-

lated his new treatment, and since then

many have been cured, and the English

language is now filled with the name of

Dr. Dixon's cure, and there have been no

recurrences. So highly are these remedies

valued that they have been copied every-

where, and are being sold in every part of

the world. It is a pity that the name of

Dr. Dixon is not known in every part of

the world. It is a pity that the name of

Dr. Dixon is not known in every part of

Large Scrotal Hernia.

The change of late years in the treatment

of rupture is a matter of course. Only a few

years ago large Scrotal Hernia or Rupture

could not be held by Trusses; now Mr. C.

Chubb, the celebrated Truss inventor, offers

in every case a success or no charge. He

goes even further than this; he offers a 100

mile return ticket on any railroad to any

one whose Rupture he cannot hold. Mr.

Chubb is a responsible man, and above the

reproach of taking advantage of people for

the sake of the price of a Truss. This can

be substantiated by the testimony of our

most worthy physicians throughout the land,

so that patients have no need to be afraid.

KIND WORDS AND TRUTH

Mr. John H. Carter, of Corbin, Ohio, writes

as follows: "My wife's Yellow Oil has done

me a great deal of good. I have been

severely afflicted with a large Rupture, and

it is now entirely cured. I will give you a

testimonial of my cure, and it will always find

a welcome spot on the shelf."

**A FRIGHTFUL SKIN DISEASE.**

Sufferings intense. Head nearly raw,  
Body covered with sores. A dead  
by the Cuticura Remedies.

MERRICK, STEVENS & BRUMER, MEDICAL, N. C.  
DEAR SIR,—About one month ago, on your  
recommendation, I bought a box of CUTICURA  
Remedy, and two boxes of CUTICURA Ointment,  
and one cake of CUTICURA SOAP, and used them for  
nearly seven years, who had been afflicted some  
for a long time, and I am pleased to say that  
believed myself cured after using them. My suffer-  
ings were indeed very severe, my face became  
my ears being gone except the tips, being nearly raw,  
body was covered with sores. The condition  
was frightful to behold. The sores have now all  
disappeared, and I feel better than I do at present, cheerful to describe it.

day. My neighbors are with me, and this is a remarkable cure, and the doubting ones are requested to call or write me, or any of my neighbors.

FARM AND GARDEN.

TIMELY TOPICS CONSIDERED IN A

PRACTICAL MANNER.

Requirements of the Cabbage Plant—Necessity

for its Rapid Growth—Varieties

That Have Gained Widespread Popu-

larity Among Gardeners and Consumers.

The cabbage requires a deep rich soil

and thorough working. Some of the large

late varieties seem to do best if the soil

is sown in the hills where they are to

remain, and in that case one or two or

three seeds where each plant is desired, then

pull up all but the strongest. Then the

large varieties three feet apart, the small

varieties from a foot to eighteen inches.

The Savoycabbages have wrinkled leaves

and are fine flavoured, especially after a

little frost has touched them in the

autumn.

Insects have been exceedingly trouble-

some to cabbage in many sections of the

year, and growers are obliged to try for

a rapid growth to wage a constant war

against the enemy.

## Changes in the Cabinet.

### THE COUNTRY LATER SIX CHAS. TUPPER.

WHO WAS REPORTED BY THE COMMISSIONER IN ENGLAND—MR. GEORGE E. FORSTER, APPOINTED BY THE QUEEN TO BE HER ADVISOR IN THE DEPARTMENT OF THE INTERIOR.

(Continued from the Empire.)

OTTERA, May 23.—The Canadian people, at least the majority of which are for long time in accord with the policy of the present administration, will learn with regret that Sir Charles Tupper is no longer a member of the Government.

At the meeting of the Cabinet held this afternoon, Sir Charles was re-appointed High Commissioner for Canada in London.

Hon. Geo. E. Forster, Minister of Marine and Fisheries, was appointed Minister of Finance.

These changes may be taken to indicate Sir Charles' withdrawal from the political arena of Canada. He will resign his seat for Cumberland forthwith and in doing so will issue an address to his constituents setting forth the causes of his resignation.

Sir Charles' withdrawal means a serious loss to the country and especially to the Liberal Conservative party, of which he is a member. He has been a prominent and distinguished member of the party since the time of his election to the House of Commons in 1872.

His long and able career in the House of Commons has been marked by a series of brilliant speeches and a consistent record of loyalty to the party.

His departure from the House of Commons is a great loss to the country and to the Liberal Conservative party.

Belleville as Usual Behind the Age.

To the Editor of the Intelligence.

DEAR MR. EDITOR.—Kindly allow me through the columns of your esteemed paper to give vent to my sentiments regarding a matter which has the first place in the hearts of a large and influential section of the community. I refer to the bill passed at the last Parliament regarding the early closing of mercantile stores.

The fact of having passed some law to the effect that a store, long looked for, and a sign of solid commerce from our hearts as we conclude it to effect.

New Sir, there are none, I am sure, but will admit that we have too long been slaves to the present state of affairs. Let us take, for instance, the case of a man in the employ of one of our mercantile establishments—married as well as single.

Well, I ask what time has that man to spend with his wife and children, or in which to do necessary work around the house, such as gardening and other chores?

He is, by law, obliged to be in the store, and, although quite a number are opposed to it, I have not the slightest doubt that the law will be carried out.

Now, I sincerely hope that our government will do away with the early closing law, and carry on the agitation until it becomes law, and then I am sure that the law will be carried out.

Thanking you heartily for space, believe me, dear Sir,

Yours very respectfully,  
ONE OF THE FRATERNITY.

To the Editor of the Intelligence.

BELLEVILLE, May 23, 1888.

I am glad to say by your issue of the 22d, that the Sanitary Inspector is trying to remedy one of our city nuisances.

At least that of buildings on East Street, for in my opinion, it is the main factor which caused the death of some of our dear ones last fall, came from the disgusting odors of that plague spot, which could not be seen under the stables with any other.

That the Inspector may be able to completely do away with those stench-traps, is the fervent wish of those who care for the health of the community.

Yours very respectfully,  
ONE OF THE FRATERNITY.

Sir,—Almost every argument that can

be used for and against the bridge scheme

has been said, and the question of the

result is just before the question shall

be submitted on the 29th, I wish to add

a few facts to which I alluded in my

place in the Council—facts which will

show the importance of the bridge, and

the bridge would cost the individual taxpayer.

It is proposed to give the Bridge Com

pany \$50,000 of the city's debt in the form

of a loan, and the interest on this loan

to be paid by the city. This is a charge

# Daily Intelligencer.

BELLEVILLE, MONDAY, MAY 28  
THE CHILD OF WATERLOO.

The story under the above title, which we commence the publication in this day's issue, is one of the famous Reginald tales, and will be found a most interesting and thoroughgoing. It will amply repay an attentive perusal.

**THEIR LAST SHOT.**  
Mr. Crook's letter is the last shot of the war. It is a magnificent document, which will influence no one to support the vague ideas of a person whose ideas of progress and the way in which to build up our city are exemplified in his Rear Street racketeering and the still more eccentric Crook's Creek on Front Street.

**TO MORROW'S VOTE.**  
The bridge question has been so thoroughly discussed, from every point of view, in our columns, that further argument on the question could only be a repetition of what has previously been said. We must, however, repeat that the bridge will be of great benefit to the city—a benefit in which every resident will share—and that it will not lead to any increase of taxes.

**THE BRIDGE.**  
We cannot understand that persons who are leading a life which opposes the bridge to misrepresent facts as they are doing. We are informed that these persons are telling people that Mr. Crook's estimate of \$90,000 is for only part of the work. They must know that this is false.

**THE BRIDGE.**  
We cannot understand that persons who are leading a life which opposes the bridge to misrepresent facts as they are doing. We are informed that these persons are telling people that Mr. Crook's estimate of \$90,000 is for only part of the work. They must know that this is false.

**RETALIATION HUMBUG.**

The Toronto Mail professes to fear that our neighbors will put in force their Retaliation Act if the report of the Fishery Treaty by the United States Senate, Canada reverts to the treaty of 1818, and winds up its article on the subject as follows:

One thing is certain—retaliation would be a most righteous settlement of the squabble. Canada would unquestionably be injured by an embargo which would prevent the fish from the United States from being sold in Canada. The United States would feel that they had been harshly treated by her neighbors, and would be likely to retaliate in some way which would be a disadvantage to the United States. This is the only utterance of the Mail with anything approaching a patriotic ring in it that has to our recollection appeared in the editorial columns of that errant journal since it turned its political coat. Our contemporary may cease its feigned apprehensions; however. No Canadian dreads retaliation; there is no prospect of a resort to it by our neighbors. Canada, by the adoption of a treaty which the President of the United States has strongly endorsed as just and equitable, has shown that the fault is not in that it is to be found necessary to revert to the old treaty. President Cleveland has distinctly admitted that that is the only alternative, and as he and a very large majority of his countrymen favor the Treaty, the President must certainly refuse to give effect to a wrong perpetrated by his political opponents for purely political purposes. Mr. Fish's fears are only humbug, in which it has become a profusion.

**EDITORIAL BRIEFS.**

The commercial union organ informs us that the commercial union in Toronto has issued a book. No "unrestricted reciprocity" in their; but the "unrestricted" men, who publicly repudiated commercial union, are nevertheless hand in glove with the other faddists. This significant circumstance demonstrates, what the G. U. organ long ago stated, namely that there is no difference between commercial union and unrestricted reciprocity.

The whole country, says the Ottawa *Frederator*, is crying out against the scandalous actions of Mr. Mowat's License commissioners. They have acted as though the business was under their personal and party benefit and the man who does not cringe to them and subscribe when called upon risks loss of his license, no matter how good may be the character of his business.

**A LUCKY ESCAPE.**  
Mrs. Cyrus Kilburne, of Belleville, Ont., was thought to be a cancer on her nose, and was about to submit to a cancer operation when the trial of the Blood Hounds, which effected a radical cure. This medicine cures all blood diseases.

**CHILDREN CRY FOR FITCH'S CASTORIA.**  
It was in the fitness of things that Lord Beaconsfield's niece, Miss Sibyl Darnley, had been married to Mr. Colverly within a few days of the 19th of April, in a church adorned with purple and white, and with the most beautiful floral decorations. The bridegroom's uncle, Sir H. Darnley, was present, and Mr. Ralph Darnley gave his daughter away.

Mr. Coningsby Darnley was present, and the Lord Chancellor and Lord London were only kept away by "Parliamentary duties." Mr. Darnley's house in Oak Square, where a reception was held on Tuesday afternoon after the wedding, was also thronged with guests.

The London *Speaker* states that Gen. Boulanger is one of the oldest men who tried for (supreme) power in France. He was born in 1837, and is now fifty-one years old. His mother was a Welsh girl, believed to have been a Miss Griffith, and he is in person singularly unlike the popular idea of him. Time is not a trace of the character in his face, which is that of a thoughtful, over-determined staff officer, trained to scientific thinking, and as much German as French. He has had thirty years' experience in the army, though not in high positions, and is reckoned by his comrades an excellent, if not a first-class, officer. They say he can organize, and this is repeated more strongly by those who were in a position to watch his short-lived administration of the War office, where he made himself superior, and where he contrived, without relaxing discipline, to make himself considered the soldier's friend. Of his inner character his acquaintances seem to know little, but they credit him with daring courage, much ambition and a most determined will. He professes to be without party feeling, and is probably at heart like most strong men in France, who are not Legitimists, a Jacobin who can govern.

**FATAL NEGLECT.**

The breaking of the smallest wheel in a mammoth factory, if not repaired or replaced, will ruin the entire plant, as a speck of dust will derange the delicate machinery of a watch. We are people as though to repair their broken health on the first approach of disease, as the owner is to mend his machinery, they should endeavor to keep their health in good order. Slight causes will sometimes derange the digestive system, and where healthy action is the health of the whole system so much depends, and feverish blood, headache, and consumption set in. The wise person will at once arrest the cause and use the most healthy remedies, such as Dr. Pierce's Golden Medical Discovery, which purifies the blood and cures liver disease. Of all druggists.

**THE WORST ANIMAL CATASTROPHES.**  
No matter how long standing, it is absolutely cured by Dr. Sage's Catarrh Remedy. It does not merely give relief, but produces permanent cures in the worst cases. 50 cents, by druggists.

**Literary Notes.**

Wm. Bygon, Toronto, has just issued in popular form a new story by Bert Harris, entitled "The Argonauts of North Liberty," and another entitled "Miracle Gold," by Richard Dowling, author of "Tempest Driven," "The Duke's Sweetheart," "Fatal Bonds," etc. For sale by all booksellers.

**"DEBARRANCE DAY."**

The years that have elapsed since the close of the civil war in the United States have served to obliterate all sectional feeling, and a united and prosperous nation joins in keeping green the graves of all its beloved dead. It is in this spirit that the publisher of the *New York Family Story Paper* has had written a thrilling and patriotic national romance, peculiarly appropriate to this national holiday, entitled "Faithful Lancers; or, His Grave Keepers Green." In the same paper will also be found a weekly instalment of the "Life and Adventures of a Showman of P. T. Barnum," written by himself, and equally interesting to the young folks as well as heads of families. These are rare literary treats, and those of our readers who are not already enjoying them will do well to obtain No. 705 of the *New York Family Story Paper* of their newsdealer or send direct to the publisher, Munro's Publishing House, Nos. 24 and 26 Vandewater Street, New York, and receive the paper four months for one dollar, post free.

**Irish Intelligence.**

LONDON, May 26.—The Chronicle says that the Pope will issue a brief reply to the letter of submission received from the Irish bishops in which he will explain that the Vatican does not disapprove Irish national aspirations within legitimate bounds.

LONDON, May 26.—The Land sub-committee of Ulster gave a hearing at Downing Street yesterday to a number of tenants whose rent was considered excessive. The Commissioners were impressed with the condition of affairs as presented, and rent in many cases was reduced 20 to 45 per cent. Although this was not all that was claimed by the tenants it is accepted as a great relief.

The Cork *Constitution*, a Tory paper, is involved just now in trouble with its printers. It seems that the printers of the *Constitution* are nearly all members of the National League, consequently they have been discharged, and their places filled by forces of men from the north of Ireland. This has not caused any trouble, as the Cork men and the *Constitution* are under police protection.

CORRIG AND AUSTIN.—Everything has failed by Allen's Lane and will be cured. Germany and Austria are negotiating with each other for the adoption of common customs regulations against Russia.

STRENGTHEN YOURSELF.—Dr. Loe's Tonic. It places the child and destroys the worm.

The Post Office Savings Bank statement of the Dominion for April shows deposits, \$770,254; withdrawals, \$788,945; balance at close of deposits, \$19,822,279.

The "Royal" Flavouring Extracts are not only in their season, but are prepared from the fruit of the best quality.

## Correspondence.

What correspondence will be accorded space for the expression of their views on topics of public interest must be in all cases determined by the editor of the *Intelligencer*.

**DEAR SIR:**—The press is the voice of the people and at the present time in the wilderness, but to the enlightened masses and he that pays tribute to Caesar's claim should be the right of the people. It was not for the want of a bridge, but for the want of the right man in the right place that would not grant a bonus to the amount of \$100,000 to complete to build a bridge which took the trade from the city and other various money which did not benefit the public in general, and which was increased to nearly a half a million dollars; and now after the city clique, who call every one a fool who does not join with them that just added another debt on the city for \$200,000 for the water works, which the tax payers have to pay yearly \$7,000, which is a very large sum for a city of 10,000. This time the city clique has been increasing the city debt, and has cancelled the city debt, and has taken from the city and other various money which did not benefit the public in general, and which was increased to nearly a half a million dollars; and now after the city clique, who call every one a fool who does not join with them that just added another debt on the city for \$200,000 for the water works, which the tax payers have to pay yearly \$7,000, which is a very large sum for a city of 10,000.

## Boys' Tweeds.

The cheapest place in town to buy boys' tweeds is at Hennessy's.

## The Jubilee Council.

Today at Mayor Rogers' presentation of the members of last year's Council with a group portrait of the Council.

## PROBABILITIES.

TUESDAY, May 29.—Moderate to fresh winds; generally fair weather, with a few local showers; stationary or a little lower temperature.

## TEMPERATURE.

As registered by Dr. Henry Reid—Registering thermometer at 10 a.m. today.

## The Double Track.

The *Wasp* says: "J. G. Kavanagh, Gananee, has discovered that his figures for the railway work between Belleville and Sidney were too low, and has declined to go on. He has put in another tender and may yet get the job at a paying price."

## He Hesitated.

John Charlesworth, arrested for drunkenness yesterday afternoon, took office Monday by the threat but found he had no spring chicken to do with. He did not feel well, when brought into court, this morning and was remanded until tomorrow.

## In Great Demand.

Few in Bridge street Methodist church are in great demand. At the annual annual allocation on Monday, many of the old members who were not in securing seats had to take seats in the gallery. The stand used by the new church, Mr. L. W. Youmans, indicated anything but hard times. Few new is paid half yearly, invariably in advance, so that the receipts were large, about \$700.

## Services Van.

Mr. Wm. Foley, who has under lease the Henderson estate, out of the city, has been troubled considerably of late by the pranks of some youths who make the "sand pits" their Sunday headquarters. Last Sunday afternoon five were started in various parts of the woods, but owing to the late hour, they were not seen until they were in the sand pits, where serious damage was prevented. About seventy feet of rail fencing were burned, however. The authorities would do well to enquire into the matter, and if possible, punish the guilty parties.

## Wicked Base Ball Enthusiasts.

Wm. Cern, O. McGuire and Wm. Hill were in the cells this morning charged with stealing a ball and gloves from the dressing room at Exhibition. They and Mr. McGuire were confined in the cells until 6 p.m., while Hill was sent on the hill till tomorrow, with a chance of being sentenced to the reformatory, as this is not his first offence. Different articles have been stolen from the dressing room and a number of players have lost sums of money while at practice. Pat Lyons is the only one who has been fortunate enough to recover lost property.

## Not Deserving Charity.

A communication appeared in last Tuesday's issue stating there was a special case of destitution on the plains—a mother with six children without bread. The members of the Woman's Christian Association lost no time in hunting the case up and found it to be a woman whom they have repeatedly tried to reclaim, and who has systematically worked the Association until she became known to the president of each district. These charitable ladies have been no better than make the donations to the W. C. A. There is not a case of deserving charity in the city but receives their prompt assistance. The underscoring are also known.

## Voting on the By-Law.

There was considerable work done today for the Bridge By-law. At 2:30, or thereabout, six polling places were visited, when the following facts were obtained: St. James Ward, 175 voters on the list, 64 votes polled; Ketchikan, 175 on the list, 74 votes polled; Baldwin, 228 on the list, 77 polled; Coleman, 220 on the list, 77 polled; Murray No. 7, 260 on the list, 95 polled; No. 8, 112 on the list, 16 polled. Of the number on the list, a large percentage are out of the city and not available to vote. The promoters, who have been at the polls all day, say the vote polled against the by-law is very small; less than one-tenth of the voters. Voters were being lured in at the time of going to press.

## Bastard Notes.

Peterborough is endeavoring to form an amateur league, embracing Peterborough, Lindsay, Port Hope and Cobourg. The Belleville list at noon today for Watersiders. They will play two games in this city to-morrow—Deerfoot and the following players comprise the team: Smith, p., Baker, c., Laughlin, l., Lyons, 2nd, Lally, 3rd, Cokeman, s., Dyson, r., Murray, l., Dalaney, c. f., Morrison, spare man.

## Slate Smith.

Slate Smith, of Pittsburgh, recently released by the Toronto, Ohio, Cockman, Gals, and Dan Delany, Toronto, have been signed by the Belleville Williams, s., and Rogers, l., have been released. Belleville will play at Oswego on Friday and Saturday.

## Games yesterday.

Games yesterday: Toronto 4, London 0; Hamilton 3, Buffalo 1.

## Strictly True.

In every respect and attested by the testimony of thousands that Putnam's Painless Corn Extract is a sure and painless cure for corns. The claim is not just as good as those made by those endeavoring to palm off imitations for the genuine only proves the superiority of Putnam's Corn Extract. Sure, safe, painless.

## ASK YOUR DRUGGIST FOR THE "ROYAL" PATENT OF LONDON.

Children Cry for Pitcher's Castoria.

## Church Anniversary.

A Successful Day—Meeting with a Choice After-Program.

## The Sunday School room of Bridge street.

presented an inviting appearance yesterday afternoon. The evening with its carefully selected and carefully rehearsed songs and hymns, and the presence of willing, skilled hands. There were plenty of prophecies kept a number away but about 400 persons partook of the refreshments.

## At 8 o'clock Dr. Wilson was called to the chair in the auditorium of the church.

After a brief address by the chairman Miss May Clark said: "The City over the River," in which she excelled herself. She was warmly encouraged by Mr. C. H. Tupper, who gave a pleasant address, relating how he had frequently been taken for a Roman Catholic priest and sometimes for the chief clerk. If the propriety of the church, he said, led the members to be so, they should not continue to prosper. Members should defend one another. What was the use of the church unless members helped each other on the way to heaven? The new converts wanted help. That which formerly gave them kind words now gave them hard words and it was the duty of the church to see that they lost nothing by the change.

## Mr. L. W. Youmans said that the receipts from contributions on Sunday and the following morning amounted to \$500, which is outside of the \$700 received for the debt. It was hoped, he said, that the debt upon the church would be relieved in about five years.

## Miss Gertrude Richardson, in a sweet, sympathetic voice, sang "Not a Sparrow Falters," and appeared again in a duet, "Hope Beyond," with Miss Clarke, who was given in a finished manner. The organ solo by Mr. Donley was cleverly performed and appreciated. It was a pleasant entertainment, enjoyed by all.

## The General Laws.

DR. DOREN WEN  
GREAT GERMAN

HAIR MA

wild be found invaluable for the hair.

It cleanses the scalp of all dandruff, invigorates the growth of the hairs, cures baldness where there are no roots, and signs of roots left it will produce crops of hair. It restores grey hair to color, and is an excellent remedy in cases of baldness where there are no roots. Do not delay if your hair is thinning; continue but get a bottle at once.
